In interpreting the claims in light of the Specification and applicants' arguments, the examiner finds the claimed invention to be patentably distinct from the prior art of record. However, the prior art does not teach or suggest, either alone or in combination, a system and method for communicating a capability descriptor as part of the startup sequence and before a user-initiated network session with the service provider entity is requested via the mobile computing arrangement, and receiving, from the service provider independently of the user requests, a data service targeted for the mobile computing arrangement for use in accordance with the capability descriptor. The examiner finds applicants' arguments filed July 7, 2008, on page 8, line 15 - page 9, line 17.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
